Bangalore, India | +91-8017432134 | officialhimadri11@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Founding Software Engineer with 4+ years building production AI platforms, real-time streaming services, cloud infrastructure, payment systems, and product-facing tools. Strong hands-on range across transformer internals, multi-agent orchestration, backend systems, GCP deployments, and startup product execution.

TECHNICAL SKILLS

Languages: Python, Go, C, C++, SQL, JavaScript

AI / ML: PyTorch, CUDA, transformer architectures, multi-agent systems, LLM tool-use, model data processing

Cloud / Backend: GCP Cloud Run/GKE/IAP, AWS, Kubernetes, Docker, gRPC, REST, Postgres, MongoDB, Firebase, Stripe

EXPERIENCE

Founding Software Engineer - Convai, Bangalore

Mar 2022 - Present

- Designed core REST APIs and gRPC streaming services for real-time conversational AI, supporting sub-200ms voice/text interactions at scale.
- Owned early GCP infrastructure across Cloud Run orchestration, autoscaling, stability and performance enhancements, and 15+ production microservices.
- Designed the payment architecture for Stripe subscriptions, usage metering, and secure checkout flows, supporting millions in transaction value.
- Successfully deployed GPU-enabled environments for enterprise accounts and built React creator-facing tools and integrations.
- Helped with data processing and training for the in-house NeuroSync model powering character facial expressions.

Systems Engineer - Tata Consultancy Services, Bangalore

May 2021 - Mar 2022

- Delivered Azure infrastructure and internal automation for enterprise operations, improving provisioning, reporting, identity, and resource tracking workflows.

Software Developer Intern - BNP Paribas, Mumbai

Jan 2021 - Mar 2021

- Built Angular, C#, and SQL Server features for an internal invoice management platform, improving data retrieval and UI workflows.
